

Reckitt

Coalition member since 2020 | As of September 2024, palm oil, soy, paper, pulp, and fibre-based packaging (PPP) are material commodities for Reckitt.

The following table includes a list of each Key Performance Indicator (KPI) for each material commodity, along with the company's 2023 reporting record. The record includes the following responses:

- “Yes” indicates a company is reporting against a KPI and reporting quantitatively where indicated
- “Yes – narrative reporting” indicates a company is reporting qualitatively against a quantitative KPI
- “Not yet reporting” response indicates a company is not yet reporting on a KPI
- “N/A” indicates a KPI was not established in a given year

Companies have also provided information on their performance against appropriate KPIs, along with methodologies and targets. This information has been self-reported by companies and verified by Proforest.

Links are provided to information when a company is reporting (“Yes”) against a public information requirement, and when a company is reporting qualitatively (“Yes – narrative reporting”) against a quantitative KPI.

For a full methodology on the Forest Positive Coalition's reporting process, including a list of all KPIs and public information requirements, visit transparency.tcgforestpositive.com

1.0 - Element 1: Own Supply Chain							
1.1 - Policy commitments to the forest positive (NDPE) goals	<p>Natural Raw Material Sourcing Standard and Palm Oil Annex outline supplier requirements on human rights, DCF cut off dates, HCS/HCVS, improved traceability, grievance process and RSPO alignment</p> <p>1) https://www.reckitt.com/media/bgijj35o/nrm-sourcing-standard_appendix-a-final_july-2023-update.pdf</p> <p>2) https://www.reckitt.com/media/2eufnrgq/nrm-sourcing-standard.pdf</p> <p>3) https://www.reckitt.com/media/nl3lyktu/sustainability-insights-2022.pdf</p>	Yes	<p>Reckitt's approach to sourcing palm oil is outlined in full in the Natural Raw Material Sourcing Standard Palm Oil Appendix. The approach outlines our commitment to No Deforestation, No Peat, and No Exploitation (NDPE) and is implemented through our palm oil programme; the planning for this, including target setting, is completed annually.</p> <p>Our palm oil programme comprises of a combination of direct supply chain activity (traceability, No Deforestation Verification and supplier engagement) and investment in the wider industry (engagement with industry groups and support to landscape programmes). A summary of our palm oil programme plan focus areas can be found in Annex 1 Diagram on page 2 of Palm Oil Appendix.</p> <p>This approach applies to 100% of palm sourced directly; Crude Palm Oil (CPO) and Palm Kernel Oil (PKO) included in our fats blends, soap noodles and palm derived surfactants volumes. Our volumes for January – December 2023 are recorded in our Sustainability Data book.</p>	Our palm oil programme comprises of a combination of direct supply chain activity including traceability exercises, satellite monitoring and supplier engagement, alongside collaboration with industry groups and NGO partners to progress industry level challenges that we cannot address alone.	100% volume of direct sourced palm	<p>NRM Sourcing Standard https://reckitt.com/media/d5ecvv13/nrm-sourcing-standard_2024-update.pdf</p> <p>NRM Sourcing Standard Palm Oil Appendix https://reckitt.com/media/frkger3d/nrm-sourcing-standard-palm-oil-appendix-a_2024-update.pdf</p> <p>Palm Oil Webpage https://reckitt.com/our-impact/healthier-planet/our-natural-raw-materials/</p>	

PALM OIL	Publicly reported value and method provided in 2023	Will your company be able to publicly report on this KPI by June 30th?	Publicly reported value or narrative for 2024 reporting on 2023 data	Methodology for value reported	Scope (materials/products in-scope of the reported value, and proportion of total commodity volume that scope represents)	Link to publicly available source	Target (Optional)
1.2 - Timebound action plan summary	<p>Palm oil programme plan summary outlines topline focus areas for 2022 and 2023, and captures progress made in 2022. RSPO metrics are linked to a timebound publicly reported target. All other areas have internal targets.</p> <p>1) https://www.reckitt.com/media/uvbplkyi/sourcing-forest-commodities_reckitt_july-2023-update.pdf (p.9-10)</p> <p>2) https://www.reckitt.com/media/bgijj35o/nrm-sourcing-standard_appendix-a-final_july-2023-update.pdf</p>	Yes	<p>- 100% palm sourced directly in support of the RSPO programme by 2026.</p> <p>- Deliver commitment to NDPE by 2025 for fats blends, and NDPE by 2030 for palm oil derivatives</p> <p>- Suppliers improving NDV score yoy and/or are on or above group (fat blends/soap noodles/palm derived surfactants) average by 2025 65% in 2023 (score 79%). Target 80% by 2025, 100% by 2030.</p> <p>Traceability is foundational to the plan (i.e. to achieve NDV 100% we have to have 100% TTP), we have focused targets on the outcome which is NDV.</p> <p>The targets have been set with consideration of external targets set by industry groups such as the Consumer Goods Forum, and Action for Sustainable Derivatives and with consideration of supplier progress as discussed in supplier meetings. Over 90% of our volume is derivatives, which involve longer more complex supply chains than palm oleon. Our fats blends target is aligned with the CGF Deforestation Conversion Free (DCF) target of 2025.</p>	Plan is resourced with budget allocated for the RSPO commitment, and traceability and NDV monitoring exercises, and supplier capacity building. Progress against planned targets are reviewed annually with procurement and updated as necessary.	100% volume of direct sourced palm	<p>ESG Data Book https://view.officeapps.live.com/op/view.aspx?src=https%3A%2F%2Fsustainability-report.reckitt.com%2Fannual-report%2F2024%2FReckitt-ESG-Data-Book-2023-2024-update.xlsx&wdOrigin=BROWSELINK</p> <p>NRM Sourcing Standard</p> <p>Palm Oil Appendix</p>

PALM OIL	Publicly reported value and method provided in 2023	Will your company be able to publicly report on this KPI by June 30th?	Publicly reported value or narrative for 2024 reporting on 2023 data	Methodology for value reported	Scope (materials/products in-scope of the reported value, and proportion of total commodity volume that scope represents)	Link to publicly available source	Target (Optional)
<p>1.6 - Progress of mills toward forest positive (or NDPE) – in alignment with the CGF-FPC Palm Oil DCF methodology.</p> <p>Progress of mills toward forest positive (or NDPE) – in alignment with the CGF-FPC Palm Oil DCF methodology</p>	<p><u>Of this 29.8% of our volume is in the 'delivering' category for No Deforestation at Production Level.</u></p> <p><u>Methodology: 2022 use of IRF, EPI and T4T. % volume coverage suppliers participating in EPI/IRF.</u></p> <p><u>Sourcing forest commodities approach 2023 (p.8)</u></p>	<p>Yes - Quantitative</p>	<p>Fat Blends: 100% FB suppliers submitted IRF reports, represents 100% FB volume. Of this volume:</p> <ol style="list-style-type: none"> 1. % meeting FP goal - DCF delivering weighted by volume: 85% 2. % not delivering weighted by volume: 7% 3. % taking action/making progress weighted by volume: 7% <p>Note: IRF data is from 2022 as not all suppliers have 2023 data in time for CGF reporting</p>	<p>IRF reports are completed by palm oil suppliers capturing progress made towards delivering NDPE at mill level. IRF reports should ideally be verified by third parties. Reckitt requests reports from all fats blends and soap noodle suppliers and aggregates the volumes from the individual suppliers scores to calculate aggregate values per category.</p> <p>IRF report results score categories definitions in alignment with the CGF:</p> <p>'Delivering' category scores are calculated as average delivering scores for forests and peat per supplier. 'Delivering' is meeting CGF's definition of meeting a forest positives goal</p> <p>'Progressing' and 'taking action' scores for forests and peat per supplier count as 'making progress'. When this is aggregated, this equals to CGF's definition of 'percentage making progress'.</p> <p>'Not compliant' category scores are associated with CGF's definition of 'not delivering'.</p> <p>Aggregate scores are weighted by volume. For example, a supplier who has a 100% score, but only supplies 10% of our volume contribute 10% to our score and calculated against the total volume represented by suppliers who submitted IRF reports.</p>	<p>100% Fats Blends sourced directly is in scope</p>	<p>ESG Data Book</p> <p>Basis of Reporting https://www.reckitt.com/media/5k5fhqcv/reckitt-basis-of-reporting-2023_v3.pdf</p>

3.4 - For coalition member companies involved, narrative summary of support provided to develop on the ground monitoring and response systems beyond own supply chains including landscape initiatives and sectoral collaborations	<p>Earthworm led landscape programmes in Indonesia and Malaysia. In 2022 the three landscape programmes covered 21% of the palm mills in our supply chain.</p> <p>Sourcing forest commodities approach 2023</p>	Yes	<p>In 2023 Reckitt continued to support Earthworm's landscape programmes in Riau, Indonesia and Sabah, Malaysia in collaboration with other companies and our suppliers. These cover 17% of our mills by volume (based on 2023 traceability data). Addressing deforestation risks are a key part of these initiatives, including implementing effective on the ground monitoring and response systems. For example, the Sabah landscape programme has resulted in a 22% reduction in deforestation by companies and communities between 2020 and 2023. Monitoring continues to identify forest loss in specific hotspots and teams work with local communities to ensure any palm oil development ensures sustainable land use in compliance with the local Malaysian Sustainable Palm Oil Certification (MSPO) standard.</p> <p>We partner with NGOs and industry groups to implement our palm oil programme and achieve our NDPE targets. One example of this is our partnership with Earthworm on our NDV pathway for fats blend and soap noodles, supplier capacity building, and landscape programmes.</p> <p>At a global level we are active members of the CGF and sit on their Steering Group. CGF enables us to use leverage to make changes in the industry that we cannot achieve alone and to drive improvements in shared supply chains collectively.</p>	See Left	All Fats Blends suppliers	Palm Oil web page sections: 'Landscape Programmes' and 'Sectoral Collaborations'	

PALM OIL	Publicly reported value and method provided in 2023	Will your company be able to publicly report on this KPI by June 30th? Linkages to shared landscape-level goals developed through multi-stakeholder process</p>	<p>Aceh, Riau, Sabah landscape programmes led by Earthworm Foundation, financial and in kind support, for full detail on each landscape programme see landscapes annex in linked document</p> <p>Sourcing forest commodities approach (2023 p.9-15)</p> <p>https://www.reckitt.com/media/nl3lyktu/sustainability-insights-2022.pdf</p>	Yes	<p>As part of our palm oil programme we seek to address challenges in collaboration with others, one way we do this is supporting NGO landscape programmes. Production landscapes prioritised for focus are high priority sourcing regions for palm oil, where significant environmental and social challenges are known to be present, and where there is good potential to achieve positive environmental and socio-economic impacts through collaborative action with a range of stakeholders.</p> <p>In 2023 Reckitt continued to support Earthworm's landscape programmes in Riau, Indonesia and Sabah, Malaysia in collaboration with other companies and our suppliers. These cover 17% of our mills by volume (based on 2023 traceability data). Addressing deforestation risks are a key part of these initiatives, including implementing effective on the ground monitoring and response systems. For example, the Sabah landscape programme has resulted in a 22% reduction in deforestation by companies and communities between 2020 and 2023. Monitoring continues to identify forest loss in specific hotspots and teams work with local communities to ensure any palm oil development ensures sustainable land use in compliance with the local Malaysian Sustainable Palm Oil Certification (MSPO) standard.</p>	See Sustainability report 2023 pg.50, palm oil webpage		Sustainability report 2023 pg. 50, palm oil webpage

1.0 - Element 1: Own Supply Chain							
1.1 - PPP Sourcing Policy including commitment to the forest positive goals	<p>NRM Sourcing Standard covers human rights, implementation of forest positive approach, traceability and grievance management</p> <p>Forest Positives document outlines supplier requirements and targets.</p> <p>1) https://www.reckitt.com/media/2eufnrgq/nrm-sourcing-standard.pdf</p> <p>2) https://www.reckitt.com/media/uybplkvi/sourcing-forest-commodities_reckitt_july-2023-update.pdf (p.10-12, 18)</p>	Yes	Our Natural Raw Material (NRM) Sourcing Standard outlines our sourcing requirements which apply to paper and board suppliers. These requirements are aligned to a forest positives approach and include our commitment to recycled and certified material.		All Reckitt packaging which is packed by Reckitt owned sites and co-packers is included. Full def - Total paper and board packaging weight includes any component used for the containment, protection, handling, delivery, storage, transport or presentation of goods, including corrugated, solid board, trays and leaflets. It excludes non-woven, laminates, labels, composite cans, non-production and embellishment spends.	<p>NRM Sourcing Standard https://reckitt.com/media/d5ecvv13/nrm-sourcing-standard_2024-update.pdf</p> <p>PPP Webpage https://reckitt.com/our-impact/healthier-planet/our-natural-raw-materials/</p>	
1.2 - Timebound action plan summary	<p><u>By end of 2022 99% of paper/board came from certified or recycled for Reckitt manufactured products. For co-packed products this was 98%. Target is 100% for both by 2025.</u></p> <p><u>Sourcing forest commodities approach 2023</u></p>	Yes	Our commitment is 100% of paper and board to either be from recycled sources or to be FSC, PEFC or SFI certified by 2025, for both direct suppliers and co-packers. We are pleased with our progress, maintaining 99% recycled or certified paper and board in 2023. Our performance is monitored through annual engagement with suppliers.	Through an annual Request for Information (RFI) suppliers provide data on annual tonnage of paper and board packaging components supplied to Reckitt in the reporting period, including material, weight in metric tonnes, certification status and scheme, percentage of virgin and/or recycled content, and this is checked against details held on internal systems disparities are resolved.	All Reckitt packaging which is packed by Reckitt owned sites and co-packers is included. Full def - Total paper and board packaging weight includes any component used for the containment, protection, handling, delivery, storage, transport or presentation of goods, including corrugated, solid board, trays and leaflets. It excludes non-woven, laminates, labels, composite cans, non-production and embellishment spends.	<p>PPP Webpage</p> <p>Basis of Reporting https://www.reckitt.com/media/5k5fhqcv/reckitt-basis-of-reporting-2023_v3.pdf</p> <p>https://www.reckitt.com/media/5k5fhqcv/reckitt-basis-of-reporting-2023_v3.pdf</p>	

PPP (Pulp, paper and fibre-based packaging)	Publicly reported value and method provided in 2023	Will your company be able to publicly report on this KPI by June 30th?
